Timer function

---

**4 functions in 1 device:** All-in-one device including cooling, ventilation, humidification and purification.

---

**Energy saving semiconductor cooling technology:** Watercooling effect with a high efficiency in order to quickly cool down the room temperature.

---

**Programmer:** The operating time can be programmed. The appliance stops automatically after the programmed time has elapsed.

---

**Diffusion of fresh air:** Fresh air is ventilated throughout the room thanks to the cross-flow fan.

---

**Ventilation speed:** Possibility to select Slow, Medium or Strong speed.

---

**Swing mode:** To activate or deactivate the oscillation of the vertical flaps.

---

**Large tank:** Given its large capacity of 6 L, it is not necessary to fill the tank all the time.

---

**Infrared remote control:** This device works with an easy-to-use infrared remote control. Make sure there is no obstacle between the remote control and the unit during use.

---

**Ionizer:** Automatic production of negative ions for an increased comfort of use.

---

**Easy to move:** Thanks to the casters located below the device.
