

DD 108 DEHUMIDIFIER

Features

Superb performance at low ambient conditions combined with wide operating range: The dehumidifier has a wide operating temperature range, from 1°C to 35°C. Because of the desiccant technology the dehumidifier shows **superior** performance at low ambient conditions (see graph). Because a heater is included even more moisture is retrieved from the air.

Eco-friendly: The dehumidifier has no compressor and no refrigerant which means its environmental-friendly and no defrost function is needed.

Ionizer function: The dehumidifier incorporates a built-in ionizer, which fills the air with healthy, negative ions, distributed by oscillating louvers.

Control: The dehumidifier can be operated via an easy to use soft button way.

Silence mode:

The DD 108 is equipped with a silence mode. When the silence mode button is pressed the sound is significantly reduced to as low as 34 dB(A). The unit will continue operation with low fan speed.

Auto Mode:

The DD 108 senses the humidity of the air and fully automatically switches automatically between silent mode and powerful mode depending on the relative humidity.

Powerfull mode:

The DD 108 is equipped with a powerful mode to dry the room in the most powerful way. Also suitable to dry for example laundry.

Removable water container: The 3.5 litre water container can easily be removed from the side of the unit. The water container has an ergonomic grip and can efficiently be emptied.

Design and appearance: Attractive, innovative design. The stylish shape and colour give the dehumidifier a distinguished look. The light weight and small dimension - the unit weighs only 6.5 kg. about half-weighted compared with traditional dehumidifiers with the same capacity - results in an easy to move and easy to store dehumidifier. The subtle presence is also emphasized by its low noise operation.

Easy to move: With its weight of only 6.5 kg this DD 108 dehumidifier is extremely easy to move.

Preventive means: Dehumidifiers remove excess water from the atmosphere. Dampness is being reduced and condensation is controlled. This way the dehumidifier can help against allergy sufferers, because these harmful particles are retrieved from the atmosphere.

Automatic switch off: When the water container is full, a sound signal is produced and the dehumidifier will automatically switch off.

Self control: The ambient condition is automatically sensed to adjust to the preset humidity, resulting in a permanent atmospheric humidity of approx 50%

Automatic, motor controlled, outlet louver: The up-down airflow can be automatically changed by using the auto swing button. By pressing the auto swing button a second time, at the moment the air outlet louver is in the desired position, the louver will stop moving and maintain this position.

Timer function: The DD 108 is equipped with a timer function. The unit will switch off after 2, 4 or 8 hours depending on the selection made by the user.

Full colour box: The unit is delivered in a full colour box showing application and operation information in 13 languages.
